**NOTE:** You will not receive all of the listed veggies each week, but you can expect to receive a generous variety of produce from each list during their peak season, with emphasis given to the "staple" veggies listed in **BOLD TYPE**.

This chart is intended to provide a generalized understanding of the types of produce you will be receiving and when they will be available. We are not in control of all the conditions needed to make a garden grow and cannot guarantee all varieties and timing, but we do promise to be diligent in what we can control, in order to bring about a timely and bountiful harvest!

\* Corn is provided through a partnership with a neighboring farm. We will provide some corn in your subscription. Greater quantities can be obtained directly through that farm. Call for more information.
